66 T is double black and polled with balanced numbers and phenotype. Granddam is a super HC Polled Manhattan daughter.

Limousin Commercial Marketing Program

The North American Limousin Foundation offers you alternatives when marketing your Limousin influenced cattle. Limousin cross calves possess muscle, leanness, feed efficiency, moderate size & performance. To capitalize on these traits, the CMP was developed to assist producers & give them the marketing advantages.

- Limousin Special Feeder Calf Sales
- Satellite Video Auctions
- Alliances / Specialty Markets
- Retained Ownership / Partners in Profit
- Feeder Calf Placement
- Feeding Tests
- LimMark Tag Program

For more information on these marketing programs call NALF (300) 220-1693.

Where's the beef? If you are looking for a bull that will put extra muscle on a set of calves, look no farther. He is double polled, extra gentle and SUPER THICK. Sired by the great Wulf's Nobel Prize bull, and out of a Wulf's Gage dam. Igenity testing info by March 10th.

With higher feed costs Limousin's inherent feed efficiency will save you money. Many feeding trials have shown Limousin require less pounds of feed per pound of gain than other breeds.

LIMOUSIN ADVANTAGE!!!!

Never has there been a better opportunity for you to add **Limousin** genetics to your herd!!!!

+**\$Limousin** cattle are the industry leader for feed efficiency. With today's higher feed costs **Limousin** are the obvious choice to make you more money.

+**\$Limousin** cattle will improve your yield grade and dressing percent. **Limousin** cattle are well known for their ability to efficiently produce high yielding well-muscle carcasses.

+**\$Limousin** cross females will impress you with the big stout calves they bring in at weaning time.

Limousin females are consistent and efficient producers. With their advantage in longevity, they will also save you money in replacement costs. If you've never used commercial **Limousin** females, you don't know what you're missing!!!!

Tess was shown at the Kansas State Fair 2008. She placed 3rd in her class. She is easy to handle and calm. Tess's dam is Lot 33. She is bred for a fall calf to BOHI Top Dollar 7144T, a son of AUTO Dollar General x Carrouels Pina Colada, and he is homozygous black and homozygous polled. If you are looking to raise show prospects, she is the one to look at.

TRISTA is double black and double polled. She is bred to the great calving ease bull WULFS NASA for an early September calf. Her full brother sold last year to our vet who has been a supporter of our program.

A.I. to Wulfs Nasas 11-28-08.

P.E. to BOHI Titlelist 7050T 12-1-08 thru 2-1-09.

Limousin Females are maternal giants when compared to other major beef breeds in terms of pounds of calf produced per female exposed. Limousin females ranked second in both high energy and extreme low energy situations.

Tiffany's dam, LFR0 Ritzy 527R, is quickly proving to be an awesome producing dam. Tiffany is her first calf, and we are offering her bred to AUTO Diesel Power 953R on 12-8-08. Diesel Power is homozygous black and homozygous polled. Tiffany is double black and double polled. Nobel Prize females are making great cows, and Tiffany, with her pedigree, should be no exception. Her depth of body, muscle, and eye appeal make her a great buy in a bred heifer.

LIMOUSIN

- Superior Muscle
- Calving Ease with Rapid Growth
- Unmatched Efficiency & Yield Grade
- Improved Docility & Marbling

DONATION HEIFER.

The members of the Kansas Limousin Breeders Association are proud to offer this stylish young show heifer prospect. The proceeds from this heifer are being donated to Bruce and Kelly Schrag and their daughter Ashley, who was born prematurely. Ashley is doing fine, but due to her premature birth, there were a lot of additional expenses that we would like to help them with. So open your hearts and checkbook and take home a great heifer.

With higher feed costs Limousin's inherent feed efficiency will save you money. Many feeding trials have shown Limousin require less pounds of feed per pound of gain than other breeds.

A show heifer with tons of potential describe this fancy daughter of Wulf's Nobel Prize 3861N and a fullblood cow, both with awesome pedigrees. Nobel Prize females make excellent cows with balanced udders and moderate frames. She is young and ready to show, but with all the potential to return to the herd and produce the keeping kind.

SHOW TIME!!! Check out this double black, polled daughter of Wulf's Nobel Prize. She is out of a super Wulf's Guardian dam and will make a tremendous cow after her show career. Igenity testing info by March 10th.

Pedigreed blends of 25% to 75% **Limousin** and Red or Black Angus, crossbreeding for the right blend of muscle, maternal ability and profit. Registered **Lim-Flex** seedstock, **Limousin-Angus** hybrids, are a profitable blend of **Limousin's** famous muscle and efficiency with Angus' marbling and maternal.

The following Semen has been donated to help support KLBA Programs.

Semen will be available for pickup on sale day.

EPD and Performance Information

The EPDs in this catalog reflect the new base used to calculate EPDs for Limousin cattle. They now have the same look as Angus EPDs. For commercial producers this rescaling helps simplify the use of Limousin EPDs by making the set of ranking benchmarks similar for both breeds. While EPDs of the two breeds cannot be directly compared, if you know the benchmark within the Angus genetic evaluation, you also know the EPD benchmarks within the Limousin evaluation. Twice a year EPDS are

recalculated to include any new data that has been submitted to NALF. This is done to keep them up to date and improve accuracies. With this in mind, expect EPDs to change on the animals you purchase. The EPDs for the Lim-Flex calves reflect the combined EPDs of the Angus Assoc. and the current information in the Limousin EPD bank from the sires and dams of that breed. As this is a fairly new development, the accuracies will be low.

PERFORMANCE EPDS:

- CED** stands for calving ease direct and is important when choosing sires to produce calves born easily. The higher the number the better.
- BW EPDs:** express the difference in birth weight on the progeny of the bulls being compared.
- WW EPDs:** express the difference in pounds at 205 days on the progeny of the bulls being compared.
- YW EPDs:** do the same as WW except it is the weight at 365 days.
- MA EPDs:** predict differences in weaning weights from daughter's calves due to genes inherited for milk.
- CETM EPDs:** stand for Calving Ease Total maternal and are important for choosing sires that produce replacement females that give birth to their first calf easily. The higher the number, the better.
- SC EPDs:** are expressed in centimeters of scrotal circumference, and compare the difference expected in sons of the animal. Scrotal EPDs are a good indicator of age of puberty of both the sons and daughters of the animal.
- CARCASS EPDS:**
- CWT EPDs:** express the difference in pounds of carcass weight.
- REA EPDs:** express the difference in square inches of rib eye area
- YG EPDs:** indicates the differences for yield grade and cutability
- MS EPDs:** express the difference in the amount of marbling or flecks of fat in the rib eye.
- \$SMTI:** dollar value mainstream index - new epd

This information should help you analyze and sort the bulls to fit your specific needs. We realize this is a lot of data to use, so please ask us if you need further assistance.

Thanks for your support of the Kansas Limousin Breeders Association and your attendance!
